

Calvary Robotics is recognized as a leading manufacturer of robotic platforms, automated production systems, and associated technologies. Calvary has multifaceted business units which include contract manufacturing and production, precision tooling & fabrication, as well as commercialization of products into the marketplace.

INDUSTRIES SERVED

- Automotive
- Healthcare
- Electrical
- Consumer Goods & Electronics
- Energy
- Food & Beverage

ROBOTIC PLATFORMS

We are uniquely positioned with our Pre-Engineered robotic platforms. The X-Cell, X-Cell II, Flex Feeding & Assembly, Flex Cell and X-Feed Tray Handlers & Feeders have revolutionized the field of automation. All platforms include flexibility in terms of process & material handling, scalability from development through production, as well as the ability to balance capital spend against capacity in a more risk managed and efficient manner.

Calvary Robotics is comprised of over 250 highly skilled and motivated personnel. Our engineering workforce has an average tenure of 15 plus years experience in systems integration, automation engineering, machine building and robotics. We incorporate the latest professional project management tools in order to provide our customers with the highest return on their investment. Our focus is on your success throughout all phases of the project from pre-automation to post automation, 24/7 full service and support.
