

X-Cell II: A Proven Pre-Engineered Solution by Calvary Robotics

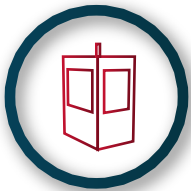

The X-Cell II is a fully scalable robotic platform offering flexibility with quick change to various processes and material handling operations.

The X-Cell II is:

Reducing Time to Market

The X-Cell II's pre-engineered nature ensures reduced lead times and time to market.

Redeployable

The X-Cell II is modular, redeployable and Clean Room compatible.

Boosting Return on Investment

The X-Cell II's efficiency and performance help bring beneficial returns on your initial investment.

Fully Scalable

The X-Cell II can link cells for separate, sequential or parallel operations.

A Proven Pre-Engineered Solution

Pre-engineering opens doors to reduced time for system validation and increased confidence in the solution's ability to exceed your unique goals.
